

Ants,

Myrmecology is the study of ants!

Ants look like little spiders. They are part of the insect family. Insects have five things in common. A head, a abdomen and a thorax. They also have six legs! They also have an exo-skeleton. The thorax is the thing in the middle. The abdomen is the bottom part of the insects, if there is a sting it will be in the abdomen. ✓

Ants have jobs, one of them is to work and the other is guarding the queen ant. The queen ant can live up to twenty years and she is the only ant that can lay eggs! The worker ant makes a home for the rest of the colonies. Ants leave an invisible trail of pheromones. They smell it to find
