

Movie bugs Reaccount!

Yesterday we went into our school playground and bushes! We had three people in our groups every one had a job! The three jobs were photographer, director and there is one job that doesn't have a name but I can explain what ~~the~~ she/she does! They move the bugs around to make the animation look realistic. There was only one group in our class that had two people! We made our animation using the app called "istomotion". We got to touch the iPad to record and talk. Every second we used speaking, we needed to take a ^{certain} amount of pictures we used six photos every second of talking. We made four little animations! After we finished we got back into the classroom and did some other stuff like saving every animation. Then we added our movies together into iMovie and we looked at every ones movie and that was the end of the day! Today the lady sent us all of the movies we made ~~very~~ VERY good movies!

I liked making iMovies yesterday! It was very fun
