

# KINDERGARTEN

## korner

In Kindergarten we are becoming more and more confident writing sentences all by ourselves! We have learnt so many strategies to help us write a sentence like finding words on our Butterfly Cards, using our word wall and words around the classroom and stretching out our words to see what sounds we can hear. During Maths, we have been practising the counting on strategy to solve our addition questions much quicker! We look the biggest number in our heads and count on the other number. Our sounds are becoming a little more tricky and this week we have been learning the 'er' sound. When we have been brainstorming 'er' words we also realised that 'ir' and 'ur' also make the same sound! Wow!

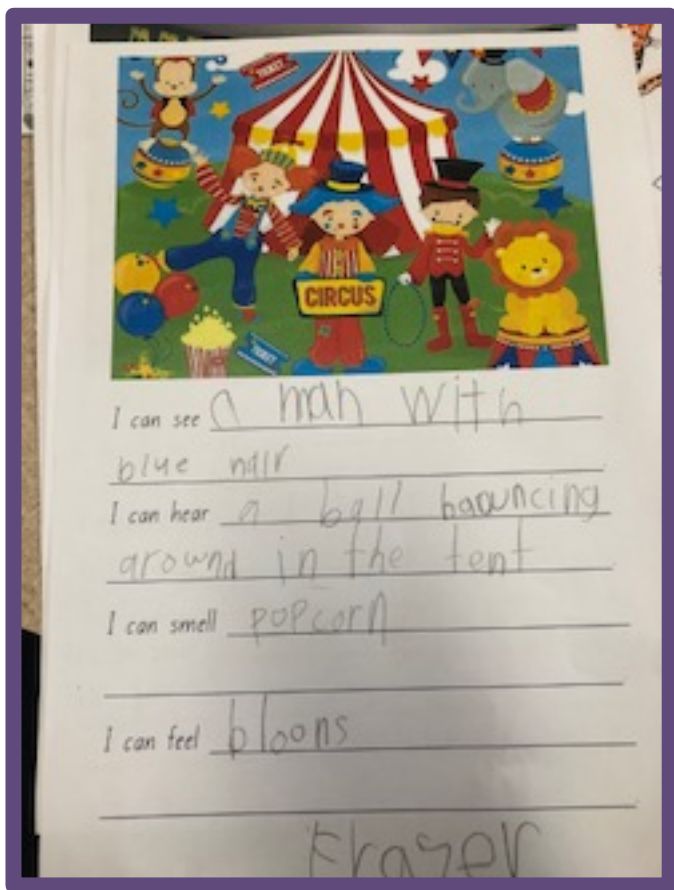

On the long weekend my aunty and uncle went to the Korean restaurant.

-Alicia

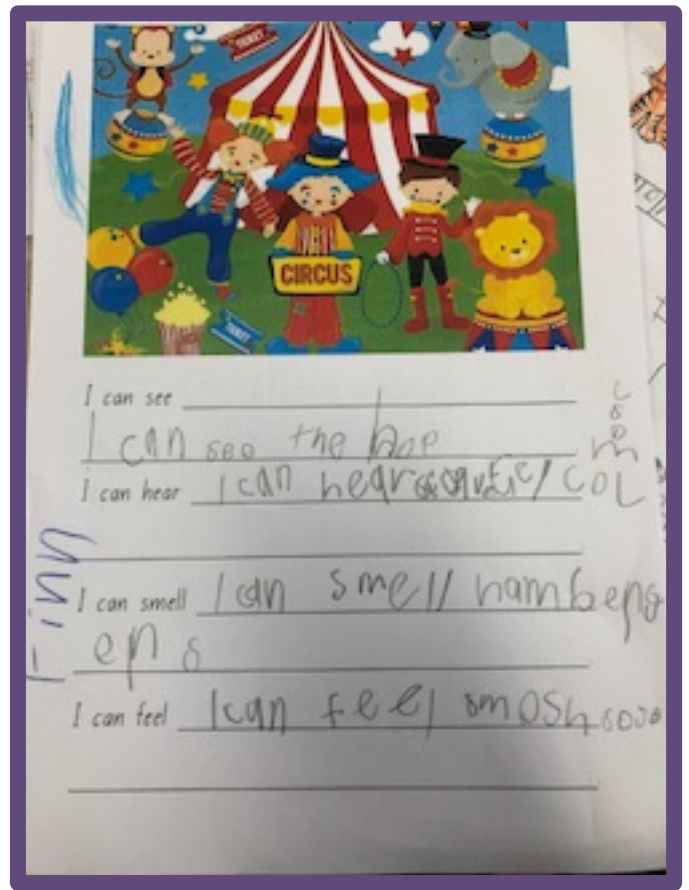

On the long weekend my friends came over to my home and we made a puzzle and we watched and we played.

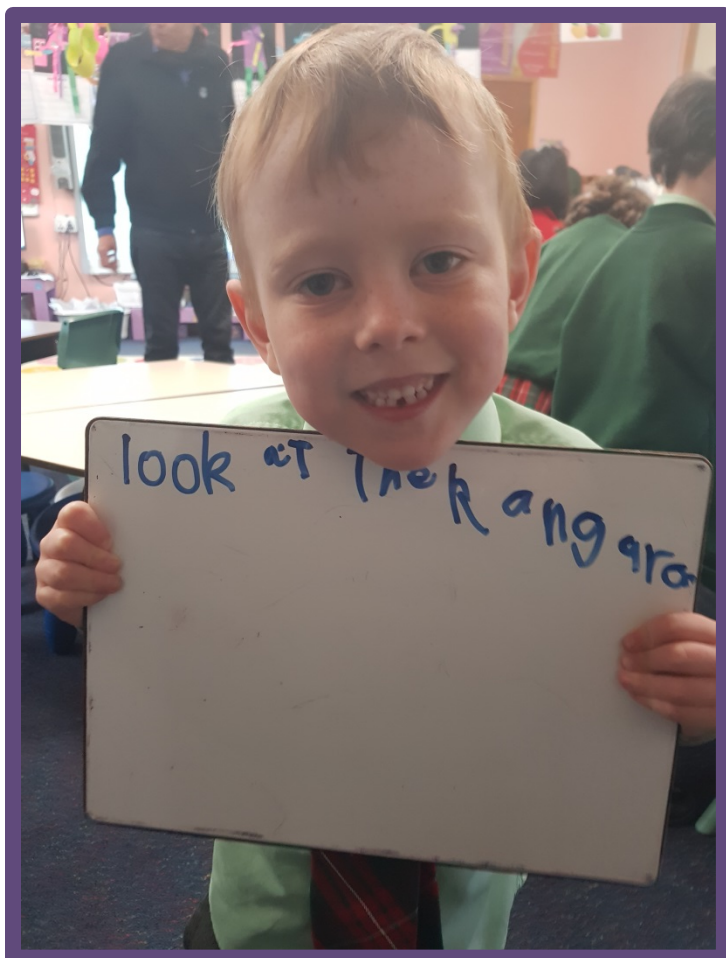

-Nicole

-Fraser

-Finn

I used my butterfly card  
and the words on the back  
wall to write my sentence.

-Max

In Science this term we have been learning about living things and their needs. This week we learnt about how living things need oxygen. Kindergarten Red did an experiment to see how leaves give us oxygen.

## Creating Oxygen Experiment

First we picked a leaf from a tree. We then filled up our cups with water and put the leaf in the cup. Next, we put our cups in a sunny spot and waited for an hour. When we went back to our cups there were little bubbles on the leaves and around the cup. The bubbles were oxygen that the leaf had made!

-Kindergarten Red

# Athletics

Every Tuesday this term we have been doing Athletics with Emily. Emily also taught us for Gymnastics last term. We had our last Athletics lesson and Emily picked two students from each class who were the Got Game Star of the Term. Those students were:

Evelyn  
&  
Johnny

Poppy  
&  
Jeremy

We run on the oval with Emily and we play tag together. We use jelly balls to practise our kicking and throwing. We get to spin and roll the hoops to the bushes. We also skip and jump over the hoops and we go through them.

Athletics is so much fun!

-Sophia
