

KINDERGARTEN

korner

Welcome back to Term 4 - the final term of Kindergarten and an exciting one at that! A new term means a start of new topics to learn about. In Literacy this term we are going to be reading lots of books and doing lots of activities about animals to get us ready for our ZOO excursion in November - which we can't wait for! Our new Science topic will be investigating different forces like pushing, pulling and rolling. And in Maths we will continue to learn and discover a variety of different concepts like hefting objects, broadening our strategies we use to solve addition and subtraction problems, as well as learning about time and the volume and capacity of different containers.

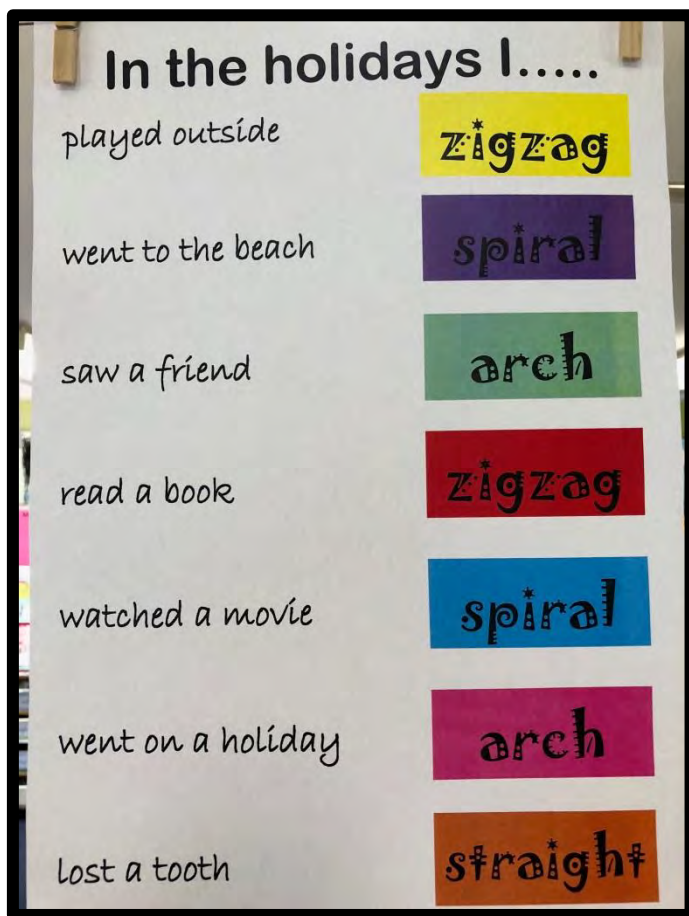

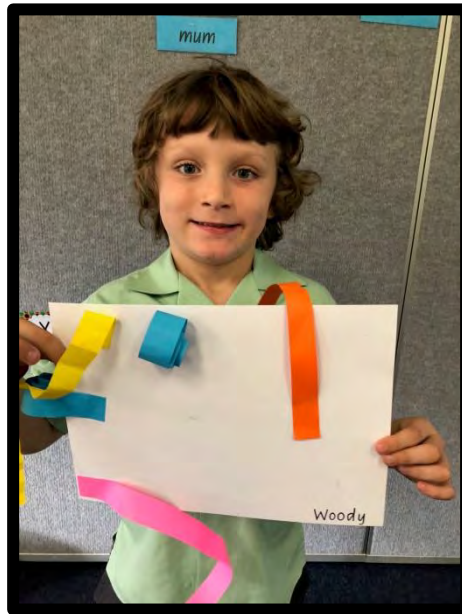

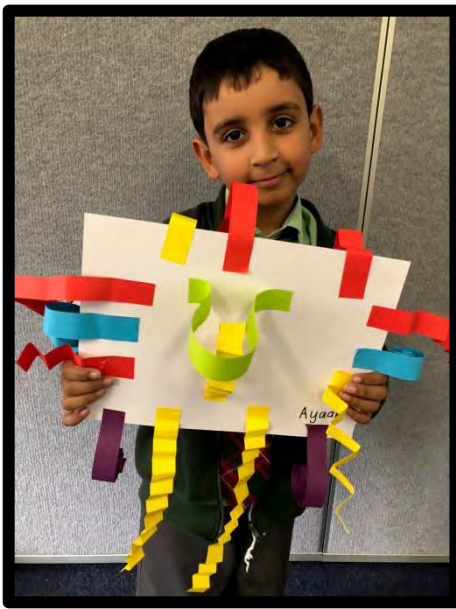

Art & Craft in the Kindergarten Classrooms

Miss Sheehy drew a lion step by step and we copied. Then when we finished drawing it we coloured it in. I coloured mine yellow, brown and orange because that's the colour of a lion.

- Finn

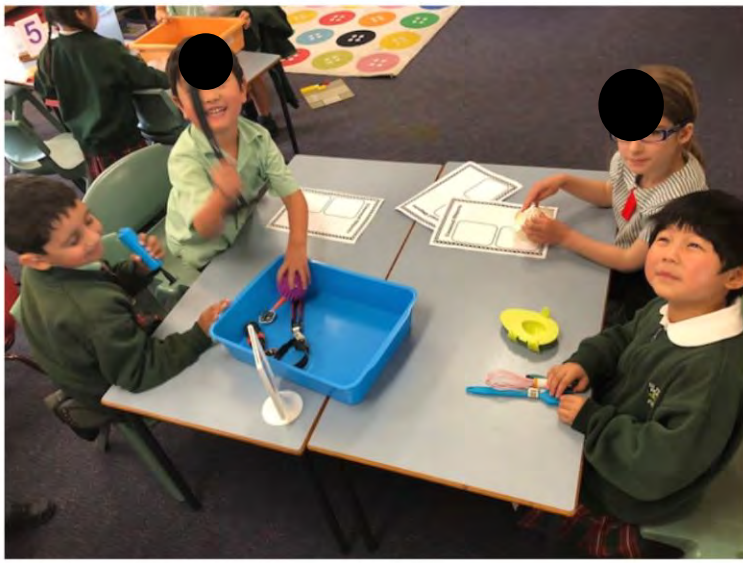

We made sculptures about our holidays. We used different coloured paper and folded it different ways to show the different activities that we did.

Can you pick what activities Ayaan, Woody and Jenson did in their school holidays?

Science

To finish off our Science unit "Objects and Materials" from last term, we did 8 rotations investigating lots of different things about objects and the materials that they are made from.

We drew pictures of some unusual items that Mrs Meyers brought in and we had to write what we thought they were used for.

Jeremy

We had to make a shelter out of Lego for the monkey. We tested the paper, plastic and wood to see which one would make the best roof so the monkey wouldn't get wet.

Keira O

Mrs Woodwell read out funny things like "What if the swimming pool was made out of jelly?" and "What would happen if your house was made out of play dough and it rained?" Then we had to come up with our own ones. I said "What if my house was made out of gummy bears?"

Zec

We had to predict which objects would float or sink. Then we put them in the bucket to see if they would float or not.

Johnny

We tested what materials are waterproof and what objects are not waterproof. We tested a plastic bag, cardboard and paper.

Henry

We had a magnet and we went around the classroom and tried to stick it on lots of different objects to see if they were magnetic.
