Writing

We did our writing a little bit differently today - we started with our picture! It was a secret picture! Mrs Meyers gave us a hint that we were going to be drawing an animal. We copied the picture step by step, trying to guess what animal it could possibly be. We first thought it was a giraffe because we needed to use a yellow pencil. Our other guess was a dog because of its eyes and nose. Then we had to draw very sharp teeth!! We guessed a sabre tooth tiger, a wolf and a Sumatran tiger - but it was not any of those either. Then Mrs Meyers drew the final step. It was a mane! We then knew our picture was of a lion. Once we had drawn our picture we wrote a sentence about our lion. Mrs Meyers was so impressed because we wrote our sentences all by ourselves!! We sounded out the words, used our butterfly cards to help, clapped the syllables and used the words around the classroom to help us.

Science

THE WEATHER: SEASONS

In Science we have been learning all about the weather and how it affects us. We have discussed symbols that are used for when it is rainy, sunny, windy and cloudy. We have talked about the seasons and the activities we like to do and the clothes we wear. We also learned what happens to the trees and animals during the seasons. For our unit, we also did a wind experiment where we tested different objects to see what moves if the wind is strong or gentle.

My favourite season is summer because I can swim in my pool, have ice blocks and swim at the beach.

My favourite season is winter because I went to the snow for the first time and skied.

My favourite season is winter because I can build a snowman.

My favourite season is spring because it is like summer but a little bit cooler.

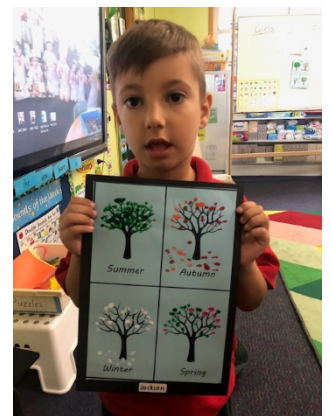

My favourite season is winter because I can fly a kite.

My favourite season is winter because I can build a snowman and have snowball fights.

-Jacob-

My favourite season is winter because it can snow.

Dash Robots

Mrs Hayllar taught us how to use the Dash robots, and boy did we love them! To use the Dash robots we use an iPad app called 'Wonder' to help control it. We can make it move lots of different directions, turn its head different ways and even program it to make funny sounds. The Dash robots are a good start in learning how to code. We can't wait to use them again!
